

ACF UFE Calculation

We have received multiple queries from students regarding the University Free Elective (UFE) requirement mentioned.

Please ignore the statement mentioned in the advisement report under UFE section which states “26 units required”

We would like to clarify the method to calculate University Free Electives is as follows (sample ACF report is attached [here](#)):

1. Check how many **Units** are left out of 130, as shown in this AAR, 21 are left. Shown below in **GREEN**
2. Check how many units are pending from each bin i.e., University Core, ACF Business Core, ACF Major Core, ACF outgroup, ACF ingroup, ACF Major Elective and note them down. In this case 12 are left for the bins in **BLUE**.
3. Calculate the total units left out of 21 units after deducting the total from the other bins in **BLUE**. In this case, its 9
4. Therefore 9 UFEs are left

BIN NAME	REQUIRED	USED	NEEDED
Unit Requirement	130	109	21
University Core	8	8	0
ACF Business Core	40	34	6
ACF Major Core	18	18	0
ACF outgroup	9	9	0
ACF ingroup	12	6	6
ACF Major Elective	15	15	0
Total left from above bins in BLUE			$0+6+0+0+6+0=$ 12
Total Left out of 21 after deducting from other bins (in BLUE)			$21-12=$ 9
ACF university free electives Needed	9		

In case of any confusions please email us at undergradadvising.sdsb@lums.edu.pk.
