

MGS UFE Calculation

We have received multiple queries from students regarding the University Free Elective (UFE) requirement mentioned.

Please ignore the statement mentioned in the advisement report under UFE section which states “26 units required”

We would like to clarify the method to calculate University Free Electives is as follows (sample MGS report is attached [here](#)):

1. First check how many **Units** are left out of 130, as shown in this Academic advisement report (AAR) 23 are left in **GREEN**
2. After that, check how many units are pending from each bin i.e., University Core, MGS Business Core, MGS Major Core, MGS outgroup, MGS ingroup & MGS Major Elective and note them down. In this case 12 are left for the bins in **BLUE**.
3. Then, calculate the total units left out of 23 units after deducting the total from the other bins in **BLUE**. In this case, its 11
4. Therefore 11 UFEs are left

BIN NAME	REQUIRED	USED	NEEDED
Unit Requirement	130	107	23
University Core	8	8	0
MGS Business Core	40	37	3
MGS Major Core	16	16	0
MGS outgroup	9	9	0
MGS ingroup	12	9	3
MGS Major Elective	15	9	6
Total left from above bins in BLUE			$0+3+0+0+3+6=$ 12
Total Left out of 21 after deducting from other bins (in BLUE)			$23-12=$ 11
MGS university free electives Needed	11		

In case of any confusions please email us at undergradadvising.sdsb@lums.edu.pk.
